

ALSTON SMITH

Lead Software Engineer

Colorado Springs, Colorado | smithalston@hotmail.com | 757-537-4794

PROFESSIONAL SUMMARY

Software Engineer with 7 years of experience developing enterprise solutions for defense, government, and commercial sectors. Expertise in Java application development, data integration systems, and DevSecOps practices. Proven track record delivering STIG-compliant solutions for DoD customers and leading technical teams through security authorization processes. Secret clearance holder with CompTIA Security+ certification.

Core Competencies: Java • C# • C++ • Powershell • BASH • Linux • Windows • Spring (Boot, Batch, Apache Camel) • Elasticsearch • Hadoop • Postgres • SQL Server • Cyber Security • DevSecOps • DoD STIG • IA Authorization • Agentic RAG AI • LLMs

PROFESSIONAL EXPERIENCE

Co-Founder & Lead Developer

LexForge | Colorado Springs, CO | *February 2025 – Present*

- Collaborated with clients to identify technical requirements and develop custom software solutions
- Developed AI-powered applications using Agentic RAG architecture with RAGFlow and Anthropic LLMs
- Built compliance tools ensuring federal regulatory adherence for FDA and FTC standards
- Designed and implemented data processing pipelines and backend systems in Java

Technologies: Java, RAGFlow, Elasticsearch, Linux, Anthropic Claude LLMs

Senior Software Engineer

Jacobs - IRES (Missile Defense Agency) | Colorado Springs, CO | *December 2020 – August 2024*

- Collaborated with Data Architects, Systems Engineers, and Project Management to design multi-source data aggregation and analysis platforms
- Developed data ingest, management, and analysis applications integrating Elasticsearch, Hadoop, Postgres, and SQL Server
- Led effort to evaluate, approve, and integrate non-Five Eyes open source software to DoD standards
- Assumed leadership responsibilities for development team during transition period, maintaining sprint deliverables

- Guided team through IA approval processes for multiple applications, coordinating with security teams
- Created detailed data flow diagrams using Visio for system design and documentation
- Developed applications using Java Spring framework (Boot, Batch, Apache Camel)

Technologies: Java, Spring (Boot, Batch, Apache Camel), ElasticSearch, Kibana, Hadoop (HDFS, Hive), Avro, Postgres, SQL Server, RHEL 6/7

Lead Software Developer

Knight Federal Solutions (JTIMS) | Suffolk, VA | *December 2019 – December 2020*

- Established DevSecOps pipeline on DI2E platform utilizing Jenkins, Jira, Bitbucket, Nexus, and Fortify
- Implemented Nexus repository to centralize dependency management for development team
- Developed Java application to automatically synchronize government database updates to local systems
- Replaced manual weekly data ingestion process with near real-time automated solution
- Developed multi-threaded applications handling synchronous and asynchronous message processing

Technologies: Java 8, Spring Boot, Oracle XE, PostgreSQL, Jenkins, Jira, Bitbucket, Nexus, Fortify

Software Developer

Validatek Inc. (Seawatch/Sea Commander) | Suffolk, VA | *January 2019 – December 2019*

- Designed and developed applications for RHEL 6/7 and Windows 10 using Java, C#, C++, and shell scripts
- Created GIS plugin to calculate optimal intercept routes between Coast Guard vessels and tracked targets
- Developed STIG compliance packages to automate system hardening for Windows and RHEL platforms

Technologies: Java 8, C#, C++, PowerShell, Bash, GIS Systems, RHEL 6/7, Windows 10

IA Programmer

Goldbelt Falcon (Seawatch) | Suffolk, VA | *February 2018 – December 2018*

- Developed automated scripts for monthly patch installation on Windows 10 and RHEL 7 systems
- Ensured systems maintained compliance with DoD security standards
- Collaborated with IA team to document vulnerabilities, implement mitigations, and create POAMs

- Provided remote support to deployed military personnel for IA updates and troubleshooting

Technologies: Java 8, PowerShell, Bash, RHEL 7, Windows 10

TECHNICAL SKILLS

Languages: Java, C#, C++, C, PowerShell, Bash, Assembly

Frameworks: Spring (Boot, Batch, MVC, Apache Camel), Spring Boot Admin, Docker

AI/ML: Agentic RAG Architecture, RAGFlow, Anthropic LLMs, Prompt Engineering

Data/Database: ElasticSearch, Kibana, Hadoop (HDFS, Hive), Avro, PostgreSQL, SQL Server, Oracle XE

DevSecOps: Jenkins, Jira, Confluence, Bitbucket, Git/TFS, Nexus, Fortify

Security: DoD STIG Compliance, IA Authorization, Vulnerability Management

Methodologies: Agile/Scrum, DevSecOps, CI/CD Pipelines

CERTIFICATIONS & CLEARANCE

CompTIA Security+ (Expires 08/28/2026) | **Security Clearance:** Secret (Active)
